

## **BHRC FEEDS THE BENFIELD STORM CENTRE**

The BHRC-led Tropical Storm Risk is now powering a real-time storm tracker on Benfield's recently launched Storm Centre. The Storm Centre is a portal providing up-to-the minute information on current and past tropical cyclone activity. In addition to the storm tracker, the Storm Centre also provides information on significant current storms together with an historical archive for the Atlantic, North East Pacific and North West Pacific Basins. More detailed event data, including damage and financial losses, is also supplied in regional summaries and individual storm reports. To access the Benfield Storm Centre go to:[www.benfieldgroup.com/stormcentre/](http://www.benfieldgroup.com/stormcentre/)
