

NEW CENTRE MEMBERS

We would like to welcome five new Centre members. Carina Fearnley has joined the BUHRC to study for a PhD on developing an alternative conceptual and methodological approach to interpreting and utilising volcanic forecasting within early warning systems. Wendy Austin-Giddings is working on a PhD on tsunami hazard in the North Atlantic Basin. Catherine Lowe has joined us to study for a PhD on designing a GIS-based decision support tool for vulnerability and risk assessment of volcanic islands in the eastern Caribbean. Emily Wilkinson is studying for a PhD on how local governance structures shape disaster risk management in the state of Yucatan, Mexico. Tina Hyde has joined the Centre for a year's placement from the University of Hertfordshire. Tina is working on the new inTERRAgate online global hazard database and is also developing a teaching resource pack on Geohazards for schools.
